2. USE

It allows slope compensation from 1 to 5 %.
To be positioned on the head of the Arkimede or Arkimede Nano support. The arrow printed on Clever indicates the direction of the slope. Once placed on the support head, the system allows further adjustment by rotation in order to completely level the paving surface with the subfloor. Clever makes it possible to create a perfectly level surface while reducing footfall noise.

3. SPECIFICATION ITEMS

Entry	Description	Unit	Price
Dak.O.TER09.1143/Cx	Supply and installation of rubber slope compensator. Diameter 120 mm, available in 3 different slopes 1 , 3 , 5 %. Made of rubber. It allows slope compensation from 1 to 5 %. The maximum slope that can be achieved is 6 %. Position on the head of the support and by means of a rotation, adjust the slope in the desired direction. Clever allows you to create a perfectly flat surface while also reducing footfall noise.
