POZ93-1155/D	Kit - Dakua+ Duo Manhole Box - Ring	200 x 200	2.26 kg/pc.	Steel	8 pcs. / - pcs.
POZ93-1155/R	Kit - Dakua+ Oblì Manhole Box - Ring	200 x 200	2.26 kg/pc.	Steel	8 pcs. / - pcs.

MATERIAL

Channel body and grating in AISI 304 stainless steel, siphoned cup with gasket and ABS basket, waterproof polyester cover.

2. DESCRIPTION

The DAKUA+ Ring Line has a modern design with perfect functionality. AISI 304 stainless steel makes up the one-piece channel body, which, without recesses, welding or screws, ensures easy cleaning and high hygienic standards. The channel body, passivated by the earth connection, contains a siphon, a removable basket and a removable gasket that can be swivelled through 360°.

High (40 l/min) is the flow rate of the water discharge, albeit with lowered heights. There is a choice of two models with interchangeable grids, in light and brushed steel.

The kit is complete, ready for installation and also includes a waterproof, glued, pre-cut and shaped polyester sheet at the channel edge against underfloor infiltration.

DAKUA+ MANHOLE COVER WITH DUO GRID OR OBLÌ-RING

3. USE

On the floor, for the collection of waste water from showers, blending in with the flooring and enhancing the surface aesthetics
